## Adjoin Adaptive Panel System: Cleaning and Disinfecting

**General Cleaning:** Linked is an install video that discusses how to clean Adjoin post install, to remove finger prints and dust for aesthetic purposes: <https://youtu.be/8IYRj-1I2Ck>

**Disinfecting:** For both Moxie or acrylic, please follow EPA/CDC guidelines for disinfecting surfaces [here](#). We've tested dozens of EPA/CDC-approved and commercially-available disinfectants included on the list for COVID-19, including:

- Spray Nine (ITW Permatex)
- Clorox Everest/Clorox QS (Clorox Company)
- Oxy-1 Wipes (Virox Technologies)
- Oxy-1 RTU (Virox Technologies)
- Oxyvir HC Disinfectant Cleaner/HC Wipes/Oxyvir 1/Oxyvir 1 Wipes (Diversey Inc)
- Lysol Disinfectant Wipes (all scents)
- Lysol All Purpose Cleaner
- and several others

**Simply follow the guidelines on the specific product's label.** Essentially spray evenly, give it appropriate contact time (these products require 1-2 min) and wipe down with a lint free cloth. We're currently adding a page to our website on this topic.
