takeform signage

Fusion™ The Space to Connect
Signage has always been functional. At Takeform, we think it should be an important part of your design palette as well. That’s why we created Fusion. To give you the flexibility to integrate architectural graphics with the essential elements of your interior. Creating an eye level connection between your space and the people moving through it. Confirming that often-underlying sense of well-being that is always the product of harmonious design.

What is Fusion? It’s room to stretch. And space to connect.
A finely tuned sensitivity to space. And those who move through it.
Designing with Fusion

Signage usually gives direction. Fusion follows yours—beautifully.

Now architectural signage can reflect the curve of your ceiling. The finish of your walls. And the colors woven throughout your interior.

In short, Fusion gives you the ability to connect with your space in very specific ways. Architectural line, materials and your client’s brand are brought together in a complete system free of the constraints you once associated with architectural graphics.

It’s time to start thinking about signage in a new way. We did.

1 Architecture

Interesting shapes that mirror the lines of your space—that describes Fusion. A sweeping bend. An ornate arch. Fusion matches your design from lobby to lounge.

2 Materials

People view signage up close. So you want the colors, textures and finishes you’ve carefully selected for your interior to be reflected in your sign design. Our materials collection offers a tasteful breadth.

3 Brand

Your client has a lot invested in their identity. It represents who they are and what they stand for. Signage has a role to play in supporting that corporate persona. And Fusion’s distinctive choices make it easy.
Connecting with Architecture

The best way to start thinking about Fusion is to consider your architecture. Within our six signage collections, Arch, Ellipse, Quad, Wave, Camber and Oblique, you’ll find unique ways to beautifully complement your interior’s predominant lines.

Discover unique forms with depth and dimension that won’t disrupt a visual stroll through your space. Straight, sweeping, angled or arched, Fusion will go with the flow.
Arch Collection

Architectural line is your starting point. You’ll find that our Arch Collection exudes a vital formality, and what goes around comes around in Ellipse.

Ellipse Collection

A Complete Sign System

Every Fusion design is a complete sign system from directories to work stations for every building location and destination. Refer to pages 24-27 for the sign types that comprise every Fusion design.
Which of our six collections best reflects your architecture? See how sharp angles find a home in our Quad Collection. And Wave offers a fluid connection to those that rise and fall.

Fusion | Design Center

Play. Finesse. Compare. Visit our online Design Center and see how shape, color, texture and graphics work together. Design an entire sign system. Print your renderings or share with clients and colleagues.

www.takeform.net/designcenter

All collections are complete sign systems. Refer to pages 24-27 for the full range of sign types that comprise every Fusion design.
Camber might be a mate for sweeping curves, while Oblique is all about angles. Within each of our collections, you will find subtle combinations that further refine your interior statement.

If you need inspiration, browse the design portfolio in our Concept Studio. It’s full of creative ideas—you’re sure to see something that will spark your imagination.

Connecting with Materials

You’ll enjoy the range of surfaces, patterns and textures Fusion affords. And if you don’t see what you’re looking for, just ask.

There’s nothing wrong with being consistent. But it is optional. Fusion lets you mix or match, integrate or punctuate. Something you couldn’t do with architectural signage before.
What's in a Fusion sign?
Opportunity. A chance to establish a harmonious connection between signage and space. Or create the unexpected by placing unique elements together for dramatic impact. Either way, we've made it easy. See our full range of materials in our Elements of Expression catalog or take a spin in our Design Center.

What goes into a Fusion sign? You.

Elements of expression
You'll like choices in your design materials. We think you should expect no less from your signage. Here is some of what we offer:

- Formica® Premium Laminates
- Formica® Premium Wood Veneers
- Myslera® Encapsulated Acrylics
- Colored Acrylics

Decorative Backer
- Lumicor® Encapsulated Acrylics
- Formica® Premium Laminates
- Formica® Premium Wood Veneers
- Colored Acrylics
- Myslera® Solid Surfaces

Metal Accent
- Black, Bronze, Brass, Natural, and Polished

Font Color
- 24 Color Font Palette
- Metallic Hardware Finishes

What goes into a Fusion sign? You.

Don't see what you're looking for? Just ask. Chances are, if you have it in your design library, we have it in ours too.

Putting it all together.

Face Material
- Select from any of our many laminates or consider the warm look of a premium wood veneer. Explore the possibilities at takeform.net.

Decorative Backer
- Choose a decorative backing to pick up a key finish from the interior. Check out the colors and textures of our laminates, add a funky metallic, tinted acrylic or the stone patterns of our Myslera® solid surfaces.

Metal Accent
- Choose an accent bar that matches the metal finish in your space. We offer five anodized finishes—black, bronze, brass, natural and polished.

Font Color
- You’ll find a wide range of typefaces and a design-sensitive color palette for all of our ADA-compliant typography.

Detail. Nuance. Or bold statement. Words not ordinarily associated with architectural signage. But Fusion gives you the option to stay comfortably within the context of the space or introduce an inspired new element. Everything from the warmth of exotic wood veneers to the vibrant pop of premium laminates, and the natural stone look of Myslera® solid surfacing. No matter what you want to say, you’ll find your voice in our wide array of textures, patterns, and colors.
At Takeform, we believe signage should do more than just identify a room or point the way; it should be a *vehicle for expression*. That view, coupled with our understanding of branding, enables us to give form to an intangible—your client’s carefully crafted corporate image.

Until now, signage didn’t offer the selection of *materials, shapes and graphics* that would allow you to add flourish or convey nuance. Now *Fusion* gives you the ability to create signage that speaks in elegant agreement with your client’s brand.
Make an impression

Signage is an interdependent element of the branding system—a way to extend your client’s corporate image throughout the interior space. Fusion’s choice of shapes, materials and graphics add precision to your efforts.

Every visit to your client’s space is another chance for customers and employees alike to reconnect with their brand. With Fusion, you can help visitors get where they’re going while keeping them impressed with where they are.

What do you want a visitor to take away from your space? Maybe it’s a sense of boldness that bespeaks a creative culture. Or a more understated grace conveying confidence. Don’t be shy. Fusion will let you express your client’s identity—vividly and consistently.
Signage isn’t all we deliver. There’s the assurance that comes from knowing we will manage every aspect of the assignment—from design to installation. We handle it so you don’t have to.
Process is peace of mind—from design to documentation

Design  First we understand your client and what you’re trying to accomplish. Then we create a look that’s not only beautiful but mirrors the lines of the architecture, the interior finishes and supports the image of the space.

A Standard  We design a complete sign system—every sign your client’s facility needs now and in the future. So your client has a sign standard assuring consistency of look with easy and cost-effective sourcing for years to come.

Programming  We identify every location with a role in the signage network and determine the information needs at each point. We study position and viewing distance. We designate sign types and provide copy and content. And we address ADA and life safety compliance.

Pre-Install Survey  Vinyl stickers are placed at the exact location of every permanent sign. This identifies install problems in advance and allows “final confirmation” that every sign achieves its purpose, both aesthetically and functionally.

Fabrication  We manufacture to exacting standards from materials that assure aesthetic quality and long-term performance. All manufacturing occurs in-house.

Installation  We handle it with crews trained and certified in the “Takeform method”.

Documentation  Finally, we document, providing your client with a complete sign systems manual—a paper and electronic re-cap of the job including renderings, drawings, location plan, message schedule, and insert templates.

5 Year Warranty  All parts. All labor. All inclusive.

Wayfinding  Optimizing “people flow”  If your project requires a complete wayfinding assessment and design, look to Takeform. We take the time to understand your environment—not just the space but the people who use it. What emerges is an image-enhancing network of signage, graphics and visual identifiers that assures optimum “people-flow”. And our seamless design-build solution means your project goes faster and costs less. More importantly, our approach assures the after sale support so often missing when sign design and fabrication are disconnected.
More sign types on pages 26-27

**Typical Directory**

Insert Change

Directional headers have raised copy. A slide-in printed insert enables the sign to be easily updated.

**Floor Directional**

Every Fusion series includes fire and evacuation maps with changeable insert. A slide-in printed insert enables updating as required.

**Overheads**

Choose from 44” and 88” width, wall mount, flush ceiling mount, or suspended. Ceiling and suspended overheads are double-sided.

**Locations**

- Elevator exits
- Stairwell exits
- Hotel rooms
- Classrooms

**Directories**

Directories are available in a full range of lens configurations. All accommodate a printed insert enabling the system to be updated as necessary. The header has raised copy.

**Locations**

- Lobbies
- Elevator exits
- Stairwell exits

**Floor & Evacuation Maps**

Every Fusion series includes fire and evacuation maps with changeable insert. Takeform will provide the maps in accordance with local code.

**Locations**

- Elevator exits
- Stairwell exits
- Hotel rooms
- Classrooms

**Directories**

All Fusion collections are complete sign systems with a full range of sign types, from directories to workstation IDs, plus all code compliant signage for every location and destination.

Fusion 56 shown. Dimensions are typical of other Fusion collections.

Fusion conference room signs include room number, up to four lines of text and a vacant/in-use slider.

**Locations**
- Conference Rooms
- Meeting Rooms

**Flag Mounts**
Flag mounts are double sided and typically oriented horizontally; however, they may be mounted vertically as well. Both orientations are perpendicular to the wall.

**Locations**
- Lobby
- Vending
- Corridors
- High traffic areas
- Impeding visibility of wall signage

Express yourself
Insert graphics bring another layer of expression to Fusion. Graphics can be used to reinforce your identity and to help unite elements of your space. They can convey a theme or express who you are and what you do. Let us show you how insert graphics can work for you.
What green means to us

Fusion brings together a selection of elements as varied as the shapes and textures of nature herself—using materials that reflect our concern for the larger environment we all inhabit. No surprise then that Takeform is the first in the signage industry to go green.

Our certification from the Sustainable Forest Initiative (SFI) covers both product and process. Learn more about SFI sourcing at sfiprogram.org.

Green to the core

The key is our substrate—Green209. It’s a real wood product sourced from forests utilizing sustainable management practices. Our laminates are also eco-friendly. Most carry the Green Guard certification for indoor air quality.
Fusion | A finely tuned sensitivity to space. And those who move through it.
